

Bornemann Pumps and More Introducing a Global System Partner

ITT

ENGINEERED FOR LIFE

ITT Bornemann - The Pump Pioneer

About Bornemann

Founded in 1853, German-based Bornemann has achieved and secured a leading position worldwide with its numerous ground-breaking pump developments over the decades. Besides oil & gas, several industries are served, i.e. chemical, petrochemical and marine as well as food & pharmaceutical applications. Systematic research and development are leading to innovative solutions for the future.

About ITT

ITT is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for the energy, transportation and industrial markets. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin modern way of life. Founded in 1920, ITT is headquartered in White Plains, N.Y., with employees in more than 35 countries and sales in a total of approximately 125 countries.

Customer Satisfaction as Part of the Company Strategy

Fair and constructive cooperation with clients, employees and suppliers is essential to our strategy and represent the foundation of the company culture. Bornemann's policy is to be an innovative, qualified and reliable partner to its customers, every step of the way, while providing a truly unique service. The needs of our customers are the focus of our research and development, manufacturing, sales and service.

Product quality, reliability and competent services are the decisive factors for customer satisfaction. From the very beginning of the installation, Bornemann Pumps and Systems are accompanied by capable services. ITT Bornemann's Service Team provides individually tailored consultation, documentation, delivery of spare parts, maintenance, repair, retooling, exchange, general overhaul, and more. Wherever in the world Bornemann Pumps and Systems are in use, Bornemann services are available.

Onshore Terminal in India

Unique Technologies

Customized Reliability

With the benefit of more than 80 years proven experience, Bornemann offers customized performance solutions for every operation. In-house design, production and 100 % workshop testing guarantee the high performance technology – essential for all addressed industries.

Bornemann Twin Screw Pump

Design & Performance

Bornemann Twin Screw Pumps are highly refined versions of the positive displacement principle, employing patented machining processes for the screw manufacture. Performance is a function of screw diameter, pitch and speed. In addition, there are special screw geometries available to give further efficiency savings of up to 25 %.

Bornemann Screw Design

Multiphase „Boosting in Libya“

Industries & Applications

Oil and Gas

Bornemann Twin Screw Pumps are ideal for pumping mixtures of crude oil, gas, water and solids. They can be used onshore and offshore. Dry running capabilities also allow the presence of gases. Compact design and special screw profiles allow high Δp for operation in pipelines with long distances.

Product Application:

Multiphase & crude oil transport, thermal operations, wet gas compression, oil & chemical storage.

Petrochemical Industry / Refinery

Bornemann Twin Screw Pumps transport low & high viscous products within terminals & refineries. All kinds of fluids, neutral, alkaline or acid and aggressive, abrasive or gaseous, are primed up safely, metered and pumped.

Product Application:

Mazut, bitumen, tar, heavy fuel, naphtha and chemical product

Marine

Bornemann Twin Screw Pumps have proven their value internationally as loading and transfer pumps on tankers, transfer pumps for heavy-duty HFO qualities and as lubricating pumps for main engine supply.

Product Application:

Bitumen, tar, light and heavy fuel oil, crude oil, mazut, chemicals & storage water

Chemical & General Industry

Regardless of low or high viscosity, aggressive, solid or shear-sensitive – twin screw pumps from Bornemann are used in any kind of chemical process. All Bornemann pumps are self-priming and ATEX-compliant.

Product Application:

Polymers, paints, slurry, pastes, liquid sulfur, and process chemicals

Hygienic Industry

Bornemann SLH-series has particularly been developed for applications in the Hygienic Industry. The 2-in-1 principle conveys and cleans in one pump.

Product Application:

Beverages, dairy products, convenience, sweets, meats, personal care, cosmetics, pharmaceuticals

Bornemann Twin Screw Pump Series

Twin Screw Pumps

Bornemann Twin Screw Pumps are rotating positive displacement pumps; the gearwheels and roller bearings are located externally without contact to the process liquid. More than 80 models are available with various materials, sizes and designs for application-optimized solutions.

Bornemann pumps cover a wide range of performances in pressure, flow, temperature and viscosity of the conveyed products, i.e. thin liquids such as petrol, hydrocarbons, seawater, liquids with high viscosity such as bitumen, tar, glue, molasses, and aggressive media such as acids and bases as well as multiphase mixtures.

User Advantages

- Self-priming
- Safe operation at high viscosities
- Low pulsations
- Low noise level
- Dry running possible
- Constant flow at varying pressures and volumes
- Suction lift up to 8.5 m (25 feet)

	Capacity		Differential Pressure		Viscosity		Max. Product Temperature	
	m ³ /h	gpm	bar	psi	mm ² /s	cSt	°C	°F
W/V Universal Pump	10 - 2,800	50 - 12,300	up to 40/60	up to 600/900	0,5 - 200,000		up to 350	up to 660
HC/VHC High Capacity Pump	up to 4,500	up to 19,800	up to 16	up to 230	1 - 20,000		up to 120	up to 250
HP High Pressure Pump	20 - 1,500	100 - 6,600	up to 100	up to 1,500	1 - 10,000		up to 120	up to 250
SLI Compact Pump	up to 180	up to 790	up to 16	up to 230	up to 100,000		up to 120	up to 250
SLH-4 Series Hygienic Pump	up to 300	up to 1,600	up to 25	up to 360	up to 1,000,000		up to 180	up to 350

Bornemann Multiphase Systems

MSL Single Well Multiphase Pump

SLM Single Line Multiphase Pump

MW Classic Multiphase Pump

MPC Multiphase Pump Compressor

Multiphase Pumping Systems

Highly experienced in research & development, engineering, production and commissioning all over the world, Bornemann is able to supply complete system solutions - for a wide range of performance parameters and harsh ambient environmental conditions.

„Plug and Pump”

The skid mounted pump is equipped with all required instrumentation, piping and valves for safe operation. Operators are getting complete systems incl. electrical drive, variable frequency converter and control system. It will undergo a complete system factory acceptance test prior to shipment, thus saving time while commissioning.

	Capacity		Differential Pressure		Viscosity		Max. Product Temperature	
	m ³ h	BPD	bar	psi	mm ² /s	cSt	°C	°F
MSL Single Well Multiphase Pump	1 - 110	137 - 16,800	up to 16	up to 230	0,5 - 100,000		up to 160	up to 320
SLM Single Line Multiphase Pump	1 - 130	150 - 20,000	up to 16	up to 230	0,5 - 100,000		up to 100	up to 210
MW Classic Multiphase Pump	1 - 8,000	up to 1,206,000	up to 50	up to 725	0,5 - 100,000		up to 160	up to 320
MPC Multiphase Pump Compressor	1 - 8,000	up to 1,206,000	up to 110	up to 1,600	0,5 - 100,000		up to 160	up to 320

Selected Applications

Tank Terminals

Country: U.A.E.
Pump Type: W9
Medium: Fuel oil, 55°C/130°F,
380cSt
Capacity: 120-1,400 m³h
530-6,200 gpm
Pressure: 10 bar / 145 psi
Speed: 200-1,470 rpm
Shaft Power: 95-630 kW /
128-848 HP

Marine

Country: China
Pump Type: W7
Medium: Crude oil,
85°C/185°F, 130cSt
Capacity: 210 m³h / 950 gpm
Pressure: 8 bar / 120 psi
Speed: 1,450 rpm
Shaft Power: 70 kW / 95 HP

Refinery

Country: Germany
Pump Type: W7T
Medium: Bitumen, 220-250°C/
430-480°F, 350 cSt
Capacity: 110-240-370 m³h
480-1,060-1,600 gpm
Pressure: 11 bar / 160 psi
Speed: 600-1,200-1,800 rpm
Shaft Power: 190 kW / 256 HP

Oil Production

Country: Russia
Pump Type: MPC 208
Medium: Fluid Multiphase
Mixture
Capacity: up to 500 m³h
75,757 BPD
Pressure: 21 bar / 305 psi
Speed: 2,000 rpm
Shaft Power: 276 kW / 370 HP
Gas content: 96 %

Offshore

Country: Germany
Pump Type: MPC 268
Medium: Fluid Multiphase
Mixture
Capacity: 610 m³h/2,686 gpm
Pressure: 25 bar / 363 psi
Speed: 1,765 rpm
Shaft Power: 450kW / 612 HP
Gas Content: 99 %

Chemical

Country: Germany
Pump Type: W7
Medium: Water, solvent,
silicon acrylate,
polyether
20-130°C / 70-
270°F,
1-15,000 cSt
Capacity: 4-100 m³h
Pressure: 1-5 bar / 14-73 psi
Speed: 300-1,400 rpm
Shaft Power: 55 kW / 74 HP
